

Radical Disruption of a Gyroscopic Device with Heterodyne Mutation

Krüppelschlag

AE '91 Installation in the SchloBbergbunker:

RADICAL DISRUPTION OF A GYROSCOPIC DEVICE WITH HETERODYNE MUTATION

Theories of relativity of disasters and of deviations manifest in this gyroscope are to produce an open uninhibited approach to disasters that have "to be overcome". The visitor – 'a recipient' in the interplay of the elements: as a victim no longer compelled to protect his or her personal security and as a spectator freed from the choice of intervention towards settling the experience of a catastrophe. The bunker between "EXPERIENCE" and "ORDEAL" ... – delimiting the implications and the reality of a catastrophe more closely; lab for observing temporary deviations of gyroscopic mutation as basis for a mathematical formula of behaviour.

THE INSTALLATION AS THE INDIVIDUALS EXPOSITION IN A CYCLE OF SEARCH FOR CATASTROPHE FROM VIRTUAL TO BANAL REALITY

STEP 1: A BUNKER IS A BUNKER IS NO PROP IS NO "ERLEBNIS"

Trapped between adventure-happy readiness for ERLEBNIS and concreted bunker mentality

STEP 2: THE WAITING ROOM

The Event, the victim, the observation – Premonitions of reality and interlacing of those three components as steps towards a forthcoming catastrophe

STEP 3: AN ORDEAL OF A GYROSCOPIC DEVICE WITH HETERODYNE MUTATION

The symmetrical gyroscope in the center of the individuals anxiety for locating disasters and their reality. A vexing play for eyes, ears and tactile senses is at the very heart of "ERLEBNIS" catastrophe. The installation serves through the ordeal of gravity as an experimental instrument to investigate a mathematical formula of behaviourism.

The Governor of the German Reich for Oberdonau
Z/HB.005/3 No. 677/43. Dec. 12, 1943
re: Elimination of the term "catastrophe" as desired by the Marshall of the Reich
In the context of air raids and the removal of the aftermath of air raids the term "catastrophe" has established itself also for the special missions of the Wehrmacht and party formations. Vehicles developed and used for relief measures also have been carrying a plate marked "Katastropheneinsatz" – "Catastrophe mission".
The Minister of Information and Propaganda in his capacity as Chairman of the Interministerial Board on Air Raid Damages has requested necessary action towards expurgating the term "catastrophe" from all organizational plans, ordinances, orders and overall usage as it has undesired psychological and political implications and effects. He recommends replacing the term "catastrophe action" uniformly by the term "immediate aid". Having brought the above to your notice I request necessary action to be instituted.
