### TONSPUR for a Public Space

Since 2003 the TONSPUR series, curated by Georg Weckwerth and Peter Szely, has featured sound works created by international artists in the public space of the MQ Wien. Their multi-channel compositions which suspend the common stereo characteristics create intriguing sound architectures and walk-in sonic spaces.

With the TONSPUR\_passage a permanent venue for sound art was established for the first time in Vienna in May 2006. One of a kind in this form in Austria and abroad, four sound works per year have been conceived and realized specially for the passage space by different artists.
