ARS ELECTRONICA
Festival for Art, Technology and Society
Linz, September 3 - 7, 2015

Mehr denn je zuvor stehen die Verschränkungen und Wechselwirkungen von Kunst und Wissenschaft im programmatischen Zentrum des Ars Electronica Festival. Ausgangspunkt dafür ist das von Ars Electronica neu initiierte und von der Europäischen Union kofinanzierte European Digital Art and Science Network. POST CITY bietet dazu drei miteinander verzahnte Ausstellungen. Die Präsentation der Prix-Ars-Electronica-PreisträgerInnen-Arbeiten der Kategorie Hybrid Art ist nicht nur das Herzstück der Ausstellung CyberArts 2015, sondern zugleich auch die Art and Science Exhibition I. Im Ars Electronica Center ist mit Elements of Art and Science Teil II der Reihe zu sehen. Die von Ars Electronica und der European Space Agency (EU) präsentierte Ausstellung Raumschiff Erde ist das letzte Drittel dieses Ausstellungsptychons.

The interrelationships among and reciprocal effects of art and science now, more than ever before, occupy the programmatic focal point of the Ars Electronica Festival. Its point of departure is the European Digital Art and Science Network that was initiated by Ars Electronica and has been co-financed by the European Union. POST CITY offers three intermeshed exhibitions. The presentation of the prizewinning works in the Prix Ars Electronica's Hybrid Art category is both the centerpiece of the CyberArts 2015 exhibition and the first Art and Science Exhibition. Another element in this series is Elements of Art and Science in the Ars Electronica Center, which is also the venue of Spaceship Earth staged jointly by Ars Electronica and the European Space Agency (EU).
