

## Deep Space LIVE: Earth's Fire-Mountains

Thursday, February 7, 2013 / 8-9 PM

(Linz, February 4, 2013) The beauty and fascination of fire-spewing volcanoes are the explosive attractions at the next Deep Space LIVE on Thursday, February 7, 2013 at 8 PM. Photographer Christoph Kaltseis invites visitors to go on a breathtaking visual journey among glowing streams of lava and craters belching smoke and gas.

### Deep Space

A visit to Deep Space is a truly unforgettable experience. It's quipped with a total of eight 1080p high-definition and active stereo-capable Barco Galaxy NH12 projectors that can display 16x9-meter, crystal-clear images on the walls and floor. Whether you're into great works from the history of art, space travel, journeys of discovery in the nanoworld, or a 3D South Sea island for kids, there are countless realms to discover in Deep Space.
