

Deep Space LIVE: Life Cycles

Thursday, April 4, 2013 / Ars Electronica Center Linz / 8 PM

(Linz, April 2, 2013) A don't-miss documentary film is on tap at the next Deep Space LIVE on Thursday, April 4. The makers of "Life Cycles" really showed their love for detail, and the prizes for their amazing effort have been rolling in ever since. The lifecycles the title refers to are those of mountain bikes—from factory production to total wreck post-crash. Five years of shooting went into this account of the world's best riders showing their stuff at breathtaking locations worldwide.

Deep Space

A visit to Deep Space is a truly unforgettable experience. It's quipped with a total of eight 1080p high-definition and active stereo-capable Barco Galaxy NH12 projectors that can display 16×9-meter, crystal-clear images on the walls and floor. Whether you're into great works from the history of art, space travel, journeys of discovery in the nanoworld, or a 3D South Sea island for kids, there are countless realms to discover in Deep Space.
