

Diversified Lineup at the Ars Electronica Center

Wednesday, July 10, 2013 / 8:15 PM / Terra Mater LIVE: We Are Planets (3-D)

Thursday, July 11, 2013 / 8 PM / Deep Space LIVE: Panoptikum

(Linz, July 9, 2013) The next Terra Mater LIVE on Wednesday, July 10th depicts the human body as a walking ecosystem. Visitors will be able to behold breathing 16x9-meter projections of extreme slow-motion footage and images taken by stereoscopic micro-cameras and electron microscopes that deliver fascinating views of the human body and reveal that the number of microbes living on our skin's surface exceeds the human population of the Earth. On Thursday at the last Deep Space LIVE before summer break, Ars Electronica Artistic Director Gerfried Stocker, Futurelab Director Horst Hörtnner and AEC Director Christoph Kremer will moderate an online excursion that brings out interesting insights into human perception and human capabilities. This will be followed at 9 PM by a marching band concert featuring the St. Magdalena Musical Society on the Main Deck of the Ars Electronica Center. At 10 PM, weather permitting, the Ars Electronica Futurelab's quadcopters will take to the air to form impressive three-dimensional images in the night sky above Linz. The Main Entrance of the Ars Electronica Center offers the best vantage point view of the so-called spaxel's formations.

Terra Mater Factual Studios

Discovering and comprehending the world are the watchwords of Terra Mater Factual Studios, the new home of the internationally renowned crew that used to produce the ORF – Austrian Broadcasting Company's award-winning UNIVERSUM series. A RED BULL Media House subsidiary founded on January 1, 2011, Terra Mater Factual Studios produces spectacular content for the cinema, TV and multimedia platforms. It's synonymous with superb quality – incredible visuals as well as great storytelling!

Deep Space LIVE

The Ars Electronica Center is now hosting a Deep Space LIVE event every Thursday (except holidays) at 8 PM. Each presentation will feature ultra-high-definition imagery in 16x9-meter format and will be accompanied by expert commentary, entertaining stand-up repartee, and musical improvisation. Whether great works from the history of art, space travel, journeys of discovery in the Nanoworld, or a live concert is what you've come to behold, Deep Space LIVE stands for enlightening entertainment amidst breathtaking worlds of imagery. Admission is €2. Holders of a valid Museum ticket are admitted free of charge.
