\* Associated Program

## IN POSTCITY

POSTCITY is the main festival venue. This is the location of most conferences, workshops, guided tours, symposia and exhibitions like the theme exhibition *Error - the Art of Imperfection*, the *Error - the Art of Imperfection* symposium, the BR41N.IO Hackathon by g.tec, as well as u19 - CREATE YOUR WORLD, the Future Festival of the Next Generation. The Opening, the Nightline and the Big Concert Night will also take place here.

## IN DOWNTOWN LINZ

The CyberArts Exhibition and the Prix Forums (artists' talks) in the OK Center for Contemporary Art showcase outstanding works singled out for recognition by the 2018 Prix Ars Electronica, the world-renowned showcase of excellence in media art. Films honored in the Prix Ars Electronica's Animation category will be screened at the Animation Festival at CENTRAL / Movimento. Linz's Mariendom / St. Mary's Cathedral will be a festival location once again this year. A project by Ars Electronica Solutions is being presented on Martin Luther Square, which thereby makes its debut as a festival venue.

## ALONG THE DANUBE

The Ars Electronica Center is once again presenting exciting content: Hauptplatz / Main Square is the site of the Campus Exhibition at the University of Art and Design, the Brucknerhaus is hosting the Prix Ars Electronica Gala, the LENTOS Art Museum is presenting the Featured Artist Exhibition „Hidden Alliances“ by Elisabeth Schimana and the Anton Bruckner Private University is staging events and conferences on digital music and sound art. The afo architecture forum Upper Austria is presenting an "Associated Program" for this year's Ars Electronica, and the St. Josef Parish Church and Memphis are also part of the Ars Electronica Festival.
